

# Certificate of Achievement for Excellence in Financial Reporting

## Comprehensive General-Purpose Checklist

For Use by All Government Types other than Public Employee Retiree Benefit Plans and Governmental Investment Pools

This checklist is available in electronic form at GFOA's website under the heading **Award Programs** in the **Certificate of Achievement for Excellence in Financial Reporting** section (<https://www.gfoa.org/coa-award>)

---

Entity Name

Fiscal Year End

The checklist is based on the authoritative guidance of the Governmental Accounting Standards Board (GASB) through GASB Statement No. 104. Questions highlighted in yellow represent questions for governments that have early implemented a GASB statement, such as Statement No. 103, *Financial Reporting Model Improvements*.

**NOTE TO READERS:** The checklist is a reference tool to help preparers find the information necessary to prepare an Annual Comprehensive Financial Report (ACFR), not an exhaustive list of every aspect of such reports required by Generally Accepted Accounting Principles (GAAP). The checklist provides preparers references to where the detailed required disclosures can be found in the authoritative literature and in the 2024 version of GFOA's *Governmental Accounting, Auditing and Financial Reporting* ("Blue Book" or "GAAFR"). For example, question 12-216-01 appears as follows

Question No.	Checklist question	Citations	GAAFR reference
12-216-01	If the government has demand bonds outstanding at the end of the fiscal year, do the notes provide all of the disclosures required by GAAP, including a description of the take-out agreement including its expiration date?  Note: Disclosures for direct borrowings and direct placements should be separated from other debt.	GASB Cod. Sec. D30.111-112	eGAAFR Chapter 30 - Liabilities- Demand bonds

The detailed list of disclosures required by GAAP can be found in the GASB codification section D30 (Demand Bonds) paragraphs 111-112, which are as follows:

.111 In addition to debt disclosures required by Section 2300, "Notes to Financial Statements," paragraphs .106 and .107, state and local governmental entities with demand bonds outstanding (regardless of when the demand provisions are exercisable) should disclose a general description of the demand bond program; terms of any letters of credit or other standby liquidity agreements outstanding, commitment fees to obtain the letters of credit, and any amounts drawn on them outstanding as of the balance sheet date; and a description of the take out agreement including its expiration date, commitment fees to obtain that agreement, and the terms of any new obligation under the take out agreement. The notes should also disclose the debt service requirements that would result if the take out agreement were to be exercised. In those disclosures, a government should separate information regarding (a) direct borrowings and direct placements of debt from (b) other debt.

.112 If a take-out agreement has been exercised converting the bonds to an installment loan, the installment loan should be reported as general long-term debt and the payment schedule under the installment loan should be included as part of the schedule of debt service requirements to maturity, as required by Section 2300.106. Information about the note disclosures for demand bonds can also be found in Chapter 30 of the GAAFR.

The checklist includes references to the GASB Codification as the source of the authoritative literature in the citations column. In situations where a new pronouncement is issued or citation was not in the GASB Codification at the time of the last update to this checklist, a reference to original pronouncements is used. The codification includes the current GAAP language and nonauthoritative illustrations for each topic. For example, GASB Statement No. 34, Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments contained extensive exhibits illustrating virtually all parts of an ACFR. While the reporting model has not changed significantly since GASB 34 was issued in June 1999, many standards have made changes which render the exhibits obsolete. These include changes to names of financial statements and elements thereof, such as deferred inflows and outflows, net position (v. net assets) and fund balance classifications, and the change to immediate recognition of certain previously deferred items such as debt issuance costs that appeared in the original illustrations. The Codification contains revised and updated set of exhibits and can be found in Codification section 2200.902; and Codification section 2200.701-.768 contains all current, relevant implementation guidance. The GASB Codification can be accessed for free through the Governmental Accounting Research System (GARS) that can be accessed on GASB’s website. (<https://gars.gasb.org/>).

One of the citations included in the citations column of the checklist is “Certificate Program requirement.” These requirements can be found on the eligibility section of the awards page (<https://www.gfoa.org/coa-program-eligibility>) and in GFOA’s best practice, *Nonauthoritative Considerations in the Preparation of an Annual Comprehensive Financial Report* (<https://www.gfoa.org/materials/nonauthoritative-considerations-in-the-preparation-of-an-acfr>).

This comprehensive general-purpose checklist includes questions that are applicable to general-purpose governments, school districts and stand-alone business-type activity governments. The comprehensive general-purpose government checklist contains a column indicating if a checklist question is specific to a school district (labeled as “school”) or to a stand-alone business-type activity (labeled as “BTA”). A specialized checklist is available for pension and other postemployment benefit systems, and external government investment pools on GFOA’s website (<https://www.gfoa.org/coa-award>).

A single numbering system is used for both of the checklists; therefore, questions beginning with 16 and 17 can be found in the pension and other postemployment benefit systems, and external government investment pools specialized checklist. Indentation is used to indicate that a given question is dependent upon a positive response to a preceding question.

**An asterisk (\*) designates specific items that of themselves normally would be sufficient to disqualify a report from being awarded the Certificate of Achievement for Excellence in Financial Reporting. However, other items, either individually or in the aggregate, also may prevent a government from receiving the award.**

<b>FINANCIAL SECTION</b> <b>MANAGEMENT'S DISCUSSION AND ANALYSIS (MD&amp;A)</b>								
				*	4-001-01	Is MD&A presented?	GASB Cod. Sec. 2200.106	GAAFR Chapter 31 - Background
					4-001-01-1	Is MD&A presented preceding the basic financial statements and after the report of the independent auditor?	GASB Cod. Sec. 2200.703-1	GAAFR Chapter 31 - Background
					4-001-02	Does MD&A describe the basic government-wide financial statements and the basic fund financial statements, as well as the difference in the kinds of information provided by each?  <i>Explanation:</i> This description should either focus on how fund financial statements reinforce information in the government-wide financial statements (e.g., proprietary fund financial statements) or provide additional information (e.g., governmental fund financial statements and fiduciary fund financial statements). In particular, it should describe the relationship between the governmental fund financial statements and the data reported for governmental activities in the government-wide financial statements.	GASB Cod. Sec. 2200.109a and .704-7	GAAFR Chapter 31 - Discussion of the basic financial statements
					4-001-03	Does MD&A provide condensed financial data extracted from the government-wide financial statements? If so, does that information include: (1) Total assets (distinguishing between capital assets and other assets)? (2) Total deferred outflows of resources? (Note: Deferred outflows are a separate element and should be reported separately from total assets.) (3) Total liabilities (distinguishing between long-term liabilities and other liabilities)? 					<b>For governments that have implemented GASB Statement No. 100, Accounting Changes and Error Corrections</b>			
					4-001-03-1	For governments that have a <b>change in accounting principle and/or a change to or within the financial reporting entity</b> , MD&A for periods earlier than those presented in the basic financial statements should not be restated or adjusted. If amounts from earlier periods are not reported consistently with the current period, because of the change made to the current period, an explanation should be included. Note: a change in accounting estimate is treated prospectively, prior periods are not restated.	GASB Cod. Sec. 2250.155-.157	GAAFR Chapter 31 - Condensed comparative financial data
					4-001-03-2	For governments that made an <b>error correction</b> , MD&A for periods presented in the basic financial statements should be restated. If amounts from earlier periods are affected by the error correction, those periods should also be restated. However only the current year's and prior year's data must be explained.	GASB Cod. Sec. 2200.109b and .704-3	GAAFR Chapter 31 - Condensed comparative financial data
					4-001-05	Does MD&A provide an overall analysis (i.e., reasons for changes) of the government's financial position and results of operations?	GASB Cod. Sec. 2200.109c	GAAFR Chapter 31 - An analysis of the government's overall financial position and results of operations
					4-001-05-1	Are explanations appropriate to the measurement focus of the financial statements for which a change is being explained?  For example, the purchase of a capital asset would decrease fund balance in the governmental funds, but have no effect on the net position reported in the government-wide statement of net position (e.g. the capital asset would be offset by a decrease in another asset and/or an increase in a liability).	Certificate Program requirement	GAAFR Chapter 31 - Discussion of the basic financial statements
					4-001-05-2	Does the MD&A specifically address whether and why the government's overall financial position has improved/increased or deteriorated/decreased)?	GASB Cod. Sec. 2200.109c	GAAFR Chapter 31 - An analysis of the government's overall financial position and results of operations
					4-001-05-3	Does the MD&A address <i>governmental activities</i> separately from <i>business-type activities</i> ? <i>If economic factors significantly affected the operating results of the current year, they should be discussed as part of this analysis.</i>	GASB Cod. Sec. 2200.109c	GAAFR Chapter 31 - An analysis of the government's overall financial position and results of operations
					4-001-06	Does MD&A provide an analysis (i.e., reasons for changes) of significant balances and transactions of individual major funds, and if applicable, whether restrictions, commitments, or other limitations significantly affect the availability of fund resources for future use?	GASB Cod. Sec. 2200.109d	GAAFR Chapter 31 - An analysis of the balances and transactions of individual funds
					4-001-07	Does MD&A provide an analysis of significant budgetary variations (both original budget versus final amended budget and final amended budget versus actual) for only the general fund?  <i>If any currently known reasons for budgetary variations in the general fund are expected to have a significant effect on future liquidity or services, the MD&amp;A should explain that fact.</i>	GASB Cod. Sec. 2200.109e	GAAFR Chapter 31 - Analysis of budgetary variations
					4-001-08	Does MD&A describe significant capital asset and long-term debt activity during the year (taking care to summarize rather than repeat information presented in the notes), including commitments made for capital expenditures, changes in credit ratings, and debt limitations that may affect the financing of planned facilities or services?	GASB Cod. Sec. 2200.109f	GAAFR Chapter 31 - Description of capital asset and long-term debt activity
					4-001-09	Does the discussion of capital asset and long-term debt activity refer readers interested in more detailed information to the notes to the financial statements?	GASB Cod. Sec. 2200, footnote 9	GAAFR Chapter 31 - Description of capital asset and long-term debt activity

					4-001-10	If the government uses the modified approach to account for one or more networks or subsystems of infrastructure assets, does MD&A state that fact? If so, do the notes include: 1) a discussion of any significant changes in the condition levels of infrastructure assets, 2) a comparison of current condition levels with target condition levels established by the government, and 3) any significant differences between the estimated amount necessary to maintain and preserve infrastructure assets at target condition levels and the actual amount of expense incurred for that purpose during the year?	GASB Cod. Sec. 2200.109g	GAAFR Chapter 31 - Discussion of infrastructure accounted for using the modified approach
					4-001-11	Does the government disclose any other “currently known facts, conditions, or decisions” that are expected to have a significant effect on financial position (net position) or results of operations (revenues, expenses, and other changes in net position), with the focus being on things that have actually happened (e.g., relocation of a major business) rather than on things that might happen (e.g., potential relocation of a major business)?	GASB Cod. Sec. 2200.109h	GAAFR Chapter 31 - Discussion of currently known facts, decisions, or condition of future significance

<b>FINANCIAL SECTION</b> <b>MANAGEMENT'S DISCUSSION AND ANALYSIS (MD&amp;A)</b> <b>For governments that have implemented GASB Statement No. 103, <i>Financial Reporting Model Improvements</i></b>								
				*	4-001-01a	Is MD&A presented?	GASB Statement No. 103, paragraph 4	
					4-001-01-1a	Is MD&A presented preceding the basic financial statements and after the report of the independent auditor?	GASB Statement No. 103, paragraph 4	
					4-001-01-2a	The MD&A should avoid unnecessary duplication. Rather than repeating information and analysis used in one section of the MD&A that is applicable to a different section, governments can simply reference the original discussion of the item. For example, if a revenue increase in the statement of activities is discussed in the analysis of governmental activities and the same explanation supports the explanations of changes in governmental funds and the general fund, the governmental fund and general fund analysis can refer to the discussion in governmental activities.	GASB Statement No. 103, paragraph 6	
					4-001-02a	<b>Overview of the Financial Statements</b> - Does MD&A describe the basic government-wide financial statements and the basic fund financial statements, including the relationship to each other as well as the difference in the kinds of information provided by each?  <i>Explanation:</i> This description should either focus on how fund financial statements reinforce information in the government-wide financial statements (e.g., proprietary fund financial statements) or provide additional information (e.g., governmental fund financial statements and fiduciary fund financial statements). In particular, it should describe the relationship between the governmental fund financial statements and the data reported for governmental activities in the government-wide financial statements.	GASB Statement No. 103, paragraph 8.a	
					4-001-03a	<b>Financial Summary</b> - Does MD&A provide condensed financial data extracted from the government-wide financial statements? If so, does that information include: (1) Total assets (distinguishing between capital assets and other assets)? (2) Total deferred outflows of resources? (Note: Deferred outflows are a separate element and should be reported separately from total assets.) (3) Total liabilities (distinguishing between long-term liabilities and other liabilities)? (4) Total deferred inflows of resources? (Note: Deferred inflows are a separate element and should be reported separately from total liabilities.) (5) Total net position (distinguishing net investment in capital assets; restricted net position; and unrestricted net position)? (6) Program revenues (by major source)? (7) General revenues (by major source)? (8) Total revenues? (9) Program expenses (at least by function or identifiable activity, as appropriate)? (10) Total expenses? (11) Excess or deficiency (before any contributions to term and permanent endowments, contributions to permanent fund principal, transfers, and unusual or infrequent items)? (12) Contributions? (13) Transfers? (14) Unusual or infrequent items? (15) Beginning net position? (16) Change in net position? (17) Ending net position from the statement of activities? 					4-001-03-2a	For governments that made an <b>error correction</b> , MD&A for periods presented in the basic financial statements should be restated. Alternatively, internal receivables and internal payables can be reported as separate line items, provided that a zero balance is still reported for each in the primary government's total column. 					*	6-002-09	<p>Is the amount reported as net investment in capital assets calculated correctly?</p> <p>Explanation: The government should calculate its net investment in capital assets using the following general formula:            Capital assets (both tangible and intangible) reported in the column for that activity            Less: Accumulated depreciation/amortization            Less: Outstanding principal of capital-related borrowings (i.e. bonds, special assessment debt with government commitment, lease liabilities, subscription-based IT arrangement liabilities, public-private and public-public partnership arrangement liabilities) related to the government's own capital assets (limited to proceeds expended for capital purposes and <b>excluding unspent proceeds</b>) ("outstanding capital debt")            Less: Debt used to refund capital-related borrowings (<b>excluding new debt issued in a crossover refunding</b> which does not take on the character of the existing debt that it will refund until the crossover date is reached. Accordingly, the new debt does not qualify as capital-related until the crossover date (i.e., the point at which the refunding occurs))            Less: Any other (non-debt) capital related liabilities as of fiscal year end, including accounts payable and retainage payable            Plus: Original issue discounts on outstanding capital debt            Less: Original issue premiums on outstanding capital debt            Plus: Capital-related deferred outflows of resources (such as a loss on refunding of outstanding capital debt)            Less: Capital-related deferred inflows of resources (such as a gain on refunding of outstanding capital debt)</p> <hr/> <p>Equals: Net investment in capital assets</p> <p>Any government reporting capital assets should report some portion of net position as net investment in capital assets, even if that amount is negative. 						Explanation: Making a loan from a revolving loan fund is not considered "spending" for this purpose.		
				*	8-001-08	Is the general fund and each of the other major governmental funds reported in a separate column?  A governmental fund that reports more than ten percent of the total governmental funds assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, revenues, or expenditures and more than five percent of the combined total of governmental funds and enterprise funds for the same element (i.e., assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, revenues, or expenditures/expenses) must be reported as a major fund.  The criteria for determining whether a fund is major should be applied to the individual funds reported in the financial statements (i.e., the columns reported in the fund financial statements for governmental funds and enterprise funds and the combining financial statements for nonmajor governmental funds and enterprise funds). If a fund meets the criteria, then it must be reported as a major fund even if it is composed of several sub-funds for internal accounting purposes and those individual component units do not meet the major fund criteria. An alternative to reporting a fund consisting of various sub-funds as a major fund is to report each fund separately for external financial reporting purposes (as a major or nonmajor fund, as appropriate) or to combine the sub-funds in a manner that doesn't result in a fund that meets the criteria for reporting as a major fund. <b>FINANCIAL SECTION</b> <b>PROPRIETARY FUND FINANCIAL STATEMENTS</b> <b>GENERAL CONSIDERATIONS</b>								
			BTA	*	9-001-01	Has the government included only proprietary fund types (i.e., enterprise funds and internal service funds)?	GASB Cod. Sec. 1300.103	GAAFR Chapter 4 - Proprietary funds
			BTA	*	9-001-02	<p>Is each major enterprise fund reported in a separate column?</p> <p>An enterprise fund that reports (1) more than ten percent of the total enterprise funds assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, revenues, or expenses and (2) more than five percent of the combined total of governmental funds and enterprise funds for the same element (i.e., assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, revenues, or expenditures/expenses) must be reported as a major fund.</p> <p>The criteria for determining whether a fund is major should be applied to the individual funds reported in the financial statements (i.e., the columns reported in the fund financial statements for governmental funds and enterprise funds and the combining financial statements for nonmajor governmental funds and enterprise funds). If a fund meets the criteria, then it must be reported as a major fund even if it is composed of several sub-funds for internal accounting purposes and those individual component units do not meet the major fund criteria. An alternative to reporting a fund consisting of various sub-funds as a major fund is to report each fund separately for external financial reporting purposes (as a major or nonmajor fund, as appropriate) or to combine the sub-funds in a manner that doesn't result in a fund that meets the criteria for reporting as a major fund.</p> <p>For external financial reporting purposes, a major fund consists of ONLY one fund. ###### BUDGET INFORMATION

**Note: for governments that have implemented GASB Statement No. 103, the budget to actual comparisons for the general fund and major special revenue funds is to be reported as RSI, following the notes to the financial statements.**

		12-090-01	If the government presents required budgetary comparisons as basic governmental fund financial statements, do the notes disclose the basis of budgeting?	GASB Statement No. 103, paragraph 16	
		12-090-02	If the basis of budgeting differs from GAAP, is a sufficiently detailed reconciliation provided in the notes (if not presented on the face of the statement)?  Explanation: GAAP describe four categories of budget-versus-actual differences: basis differences, timing differences, perspective differences, and entity differences. [COD 2400.109-.119] These categories provide the <i>minimum level of detail</i> required by GAAP. That is, if a fund had items from each of these categories, the reconciliation would need to present at least four reconciling amounts.  <i>If the government presents required budgetary comparisons as a basic governmental fund financial statement, the notes should disclose excesses of expenditures over appropriations in the general fund and annually budgeted major special revenue funds.</i>  <i>Regardless of whether the government presents required budgetary comparisons as basic governmental fund financial statements or as RSI, the notes to the financial statements should disclose any material violations of the budget.</i>	GASB Cod. ##### NOTE DISCLOSURES - EMPLOYER PENSION/OPEB PLANS

			13-600-00	<p>Explanation: Questions 13-600-00 thru 13-615-99 are for disclosures that should be made for benefits provided through each pension and OPEB plan that is <i>administered through a trust or equivalent arrangement</i> in which the government (as an employer) participates. To be a GASB-compliant <i>trust or equivalent arrangement</i>, all three of the following criteria must be met: (1) Contributions from employers and nonemployer contributing entities to the pension/OPEB plan and earnings on those contributions are irrevocable; (2) Pension/OPEB plan assets are dedicated to providing pensions to plan members in accordance with the benefit terms; and (3) Pension/OPEB plan assets are legally protected from the creditors of employers, nonemployer contributing entities, and the pension/OPEB plan administrator. If the plan is a defined benefit pension/OPEB plan, plan assets also are legally protected from creditors of the plan members. Throughout this section of the checklist, pensions and OPEB are referred to as "pension/OPEB." Please note that separate disclosures are required for each pension and OPEB plan.</p> <p>Applicable disclosures for each pension and each OPEB plan should be made separately (in different notes). When a government participates in more than one such pension or OPEB plan, the disclosures that relate to more than one pension plan or more than one OPEB plan should be combined in a manner that avoids unnecessary duplication.</p> <p>When the type of plan is either a single-employer or agent multiple-employer pension/OPEB plan and the individual plan provides benefits to both the employees of a primary government and its component units, the note disclosures in the reporting entity's financial statements should separately identify amounts associated with the primary government (including its blended component units) and those associated with its discretely presented component units. Further, in the reporting entity's financial report, the requirements for a single or agent multiple-employer plan should be applied. However, in stand-alone financial statements, each government should account for and report its participation in the single-employer or agent pension plan by applying the allocation requirements for a cost sharing multiple-employer plan (assuming the amounts to allocate are material).</p> <p>When an employer includes the pension/OPEB plan in its financial reporting entity as a pension/ OPEB trust fund or as a fiduciary component unit, the plan disclosures required for each pension/ OPEB that issues a stand-alone report that follows the guidance of GASB Statement Nos. 67 and 74 should also be combined in a manner that avoids unnecessary duplication with the required employer reporting which follows the guidance of GASB Statement Nos. 68 and 75.</p>

					13-610-03-1	<b>Explanation:</b> When the plan is a cost sharing multiple-employer plan, the NPL/NOPEBL reported by each employer government is its proportionate share of the collective NPL/NOPEBL for the cost sharing plan as a whole. Consistent with that reporting, the alternate calculations of the NPL/NOPEBL described above should use the employer's proportionate share of the cost sharing plan's collective NPL/NOPEBL (rather than the NPL/NOPEBL for the cost-sharing plan as a whole).

<b>PENSION/OPEB PLAN ISSUES SEPARATE REPORT</b>								
		13-614-00				Explanation: The notes should indicate whether the separate information for the plan is available as a stand-alone financial report that the plan issues or the plan is included as a fiduciary fund in another government's report (e.g., the report of a public employee retirement system or another government). The disclosure about how to obtain the report can be addressed by various methods that include providing a link to the report on the public employee retirement system's website, providing contact information (e.g., e-mail address, telephone, or mailing address), or providing the office location of where the report can be obtained.		
		13-614-01				If the government is an employer or a nonemployer contributing entity for a defined benefit pension/OPEB plan (regardless of its type) that is administered through a trust or equivalent arrangement, and the plan is reported as a pension (and other employee benefit) trust fund, and that plan issues a separate report, do the notes provide additional information? (1) That the plan issues a separate publicly available report and how to obtain the report? (2) That the plan's fiduciary net position has been determined on the same basis used by the pension plan? (3) The plan's basis of accounting, including the policies with respect to benefit payments (including refunds of employee contributions)? (4) How investments are valued? (5) Information about the substance and magnitude of significant changes that indicate the plan's disclosures generally do not reflect the facts and circumstances at the government's measurement date (if applicable)? <b>PENSION/OPEB PLAN DOES NOT ISSUE SEPARATE REPORT</b>								
		13-615-01				If the government is an employer or a nonemployer contributing entity for a defined benefit plan (regardless of the type of plan) that is <i>administered through a trust or equivalent arrangement</i> , and the plan is reported as a pension (and other employee benefit) trust fund, but that plan does not issue a separate report, do the notes include financial statements for each such individual plan (regardless of the type of plan) if the individual fund statements that provide this information are not within the scope of the audit?  Explanation: If the independent auditor only takes in relation to responsibility for the individual fund statements, then the financial statements for each individual benefit plan should be included within the notes so that data for each benefit plan is included within the scope of the audit. <b>DEFINED BENEFIT PLANS NOT HELD IN TRUST OR EQUIVALENT ARRANGEMENT</b>								
		13-620-00				Explanation: Questions 13-620-01 thru 13-623-99 are for disclosures that should be made for benefits provided through each pension and OPEB plan that is <b>NOT administered through a trust or equivalent arrangement as defined in GASB Statements 68 and 75 [COD P20.101 and COD P50.101, respectively] in which the government (as an employer or nonemployer contributing entity) participates.</b>  Applicable disclosures for each individual pension plan should be made in a single pension note, and those for each individual OPEB plan should be made in a single OPEB note. When a government participates in more than one such pension plan or OPEB plan, the disclosures that relate to more than one pension plan or more than one OPEB should be combined in a manner that avoids unnecessary duplication.  When the type of plan is either a single-employer or agent multiple and the individual plan provides benefits to both the employees of a primary government and its component units, the note disclosures in the reporting entity's financial statements should separately identify amounts associated with the primary government (including its blended component units) and those associated with its discretely presented component units. 		13-620-00-1				Explanation: For purposes of classifying a pension/OPEB plan as single-employer or multiple-employer, a primary government and its component units are considered one employer. For purposes of stand-alone financial reporting in that circumstance, the primary government and the component unit are required to recognize a proportionate share of the collective total pension/OPEB liability. The checklist has indicated disclosures specific to this situation as <b>stand-alone reports</b> . All other disclosures would apply.	GASB Cod. Sec. P22.115, .139 GASB Cod. Sec. 		13-620-00-2				Explanation: Special funding situations involve circumstances in which a nonemployer entity is legally responsible for making benefit payments directly to the employees of another entity as the pension/OPEB come due and <i>either</i> of the following conditions exists: a) the amount of benefit payments for which the nonemployer entity is legally responsible is <i>not</i> dependent upon one or more events or circumstances unrelated to the pensions/OPEB; or b) the nonemployer entity is the only entity with a legal obligation to make benefit payments as they come due. 					14-710-07	For any plan (regardless of its type), are the contribution requirements of the employer government established statutorily or contractually? If so, is a 10-year schedule included that provides information about the employer contribution requirements determined as of the employer's most recent fiscal year end?  If yes, does the schedule include the required elements for each year? For purposes of this schedule, contributions should include only amounts recognized as additions to the pension plan's fiduciary net position during the employer's fiscal year resulting from actual contributions and from contributions recognized by the pension plan as current receivables. The schedule should include the following items: (1) The statutorily or contractually required employer contributions. (a) (2) The amount of contributions recognized by the plan in relation to the statutorily or contractually required employer contribution. (b) (3) The difference between (a) and (b). The combining statements should include total columns that are easily traceable to the corresponding column in the basic fund financial statements.  The presentation of fund financial statements for discretely presented component units is not a substitute for the presentation of combining statements when there are more than one discretely presented component units. GASB Cod. Sec. 2400.104	GAAFR Chapter 33 - Financial section-Individual fund and discretely presented component unit financial statements
				*	15-001-07-1	Explanation: The legal level of budgetary control is the lowest level at which a government's management may not reallocate resources without special approval of the governing body. In certain extreme cases, the legal level of budgetary control may be so detailed that it is not practical to demonstrate compliance within the ACFR itself. In such cases, a separate, publicly available, budgetary report may be issued to demonstrate compliance at the legal level of budgetary control, provided the ACFR contains a reference to the existence of this separately issued report, in the notes to the financial statements. This reference to a separately issued budgetary report, however, does not eliminate the need to present budgetary comparisons within the ACFR for all individual governmental funds with legally adopted annual budgets. Rather, the level of detail needed for the individual fund budgetary comparisons need not exceed the level associated with the basic financial statements (that is, expenditures by function).  If a separate report is issued, the government should: (1) Make the separate report available to the public (e.g., website). (2) Submit a copy of the separate report to GFOA with the ACFR submission in the Award Management System. (3) Include a reference to the separate report (e.g., web address) in the ACFR, in the notes to the financial statements. (4) Ensure that the amounts stated in the separate are easily traced to the budgetary comparison level of detail (i.e. function or program level) presented in the ACFR. It may be necessary to include additional reconciliations or schedules, to indicate how the amounts in the ACFR and the separate report articulate.	GASB Cod. 						<b>STATISTICAL SECTION</b>		
					18-800-00	The Statistical section presents information about the government in five main categories: Financial Trends, Revenue Capacity, Debt Capacity, Demographic and Economic Information, and Operating Information. The Statistical section provides the users of the financial statements a historical background on how the government has performed by reporting multi-year data. The Statistical section should focus on the primary government. Details on each table can be found in GASB Statement 44 or Codification Section 2800. Most tables require ten years of data to be presented or the data for current year and nine years prior. Governments should disclose the reason when ten years of data is not presented in a table that normally requires ten years, if applicable. In the same way, disclose the reason when the required data is not presented in a table for the period nine years prior to the current period, if applicable.	GASB Cod. Sec. 2800.102-.105 Certificate Program requirement	GAAFR Chapter 35 - Background
					18-800-00-1	<b>For governments that have implemented GASB Statement No. 100, Accounting Changes and Error Corrections</b> For governments that have a change in accounting principle and/or a change to or within the financial reporting entity, statistical section information for periods earlier than those presented in the basic financial statements should not be restated or adjusted. If amounts from earlier periods are not reported consistently with the current period, because of the change made to the current period, an explanation should be included. Note: a change in accounting estimate is treated prospectively, prior periods are not restated.	GASB Cod. Sec. 2250.155-.157	GAAFR Chapter 35 - Background
					18-800-00-2	For governments that made an error correction, statistical section information for periods presented in the basic financial statements should be restated. If amounts from earlier periods are affected by the error correction, those periods should also be restated. Periods presented in the statistical should be identified as restated or not restated and an explanation about the nature of the error should be provided. If restatement of earlier periods is not practicable, an explanation as to why should be included.	GASB Cod. Sec. 2250.158-.159	GAAFR Chapter 35 - Background
				*	18-800-01	Does the report include a statistical section?	GASB Cod. Sec. 2800.701-1	GAAFR Chapter 35 - Background
						<b>STATISTICAL SECTION</b> <b>FINANCIAL TRENDS</b>		
					18-801-01	Net Position – Does the statistical section separately present net position of governmental activities, business-type activities, and the total primary government by the three individual components of net position (i.e., net investment in capital assets, restricted, and unrestricted)?	GASB Cod. Sec. 2800.108	GAAFR Chapter 35 - Ten-year trend information on the components of net position
					18-801-02	Changes in Net Position – Does the statistical section separately present the changes in net position of governmental activities, business-type activities, and the total primary government (i.e., expenses by function, program, or identifiable activity; program revenues by category; significant charges for services revenues presented by function, program, or identifiable activity; total net (expense) revenue; general revenues and other changes in net position by type; and total change in net position)?	GASB Cod. Sec. 2800.109	GAAFR Chapter 35 - Ten-year trend information on changes in net position
			BTA		18-801-03	Changes in Net Position – Does the statistical section separately present the changes in net position of the stand-alone BTA (i.e., operating revenues and expenses presented separately from nonoperating revenues and expenses; revenues presented by major source; operating and nonoperating expenses presented (at the level of detail reported in the statement of revenues, expenses and changes in net position); other changes in net position presented if applicable (e.g., capital contributions, special items); and total change in net position)?	GASB Cod. Sec. 2800.109a	GAAFR Chapter 35 - Ten-year trend information on changes in net position
			BTA		18-801-03a	<b>For governments that have implemented GASB Statement No. 103, Financial Reporting Model Improvements</b> Changes in Net Position – Does the statistical section separately present the changes in net position of the stand-alone BTA (i.e., operating revenues and expenses presented separately from noncapital subsidies; and other nonoperating revenues and expenses; revenues presented by major source; operating and nonoperating expenses presented (at the level of detail reported in the statement of revenues, expenses and changes in net position); other changes in net position presented if applicable (e.g., unusual and infrequent items); and total change in net position)?	GASB Statement No. 103, paragraph 17	
					18-801-04	Fund Balances – Does the statistical section separately present information on the fund balances for the general fund and all other governmental funds in the aggregate by the individual components of fund balance (i.e., nonspendable, restricted, committed, assigned, and unassigned)?  Note: It is only necessary for a government to apply the GASB Statement No. 54 categories prospectively beginning with the year that the pronouncement is implemented. In that case, an explanation of the nature of the differences from the prior information should be provided on the table.	GASB Cod. Sec. 2800.111a	GAAFR Chapter 35 - Ten-year trend information on fund balances
					18-801-05	Changes in Fund Balances – Does the statistical section present the changes in fund balances for total governmental funds (i.e., revenues by source; expenditures by function, including debt service by principal and interest; other financing sources and uses and other changes in fund balance by type; and total change in fund balances? If so:	GASB Cod. Sec. 2800.111b	GAAFR Chapter 35 - Ten-year trend information on changes in fund balances
					18-801-06	Is a ratio of total debt service expenditures to noncapital expenditures presented?  Explanation: The amount of noncapital expenditures of governmental funds excludes the expenditures that are reported as capital assets on the accrual basis (i.e., in the government-wide financial statements). The total amount of noncapital expenditures excludes not only those amounts that are reported in governmental funds as a separate capital outlay line item, but also the amounts that are included within functional expenditure categories. Conversely, "capital outlay" for items that do not meet the capitalization threshold should be included as noncapital expenditures.	GASB Cod. Sec. 2800.111b, footnote 5	GAAFR Chapter 35 - Ten-year trend information on changes in fund balances
						<b>STATISTICAL SECTION</b> <b>REVENUE CAPACITY</b>		
					18-802-01	Revenue Base – Does the statistical section present information for the major components of the revenue base of the government's most significant source of own- source revenue (i.e., the direct rate applied; assessed value by component (if property tax is used); total estimated actual value of taxable property (if property tax is used))?	GASB Cod. Sec. 2800.112-.114	GAAFR Chapter 35 - Information about the revenue base (ten years)
			BTA		18-802-01-1	At a minimum, the enterprise fund must present information for its most significant own-source revenue. Generally, the largest own-source revenue will be a charge for service (e.g., usage charges for utilities, landing fees for airports, tuition for colleges, passenger fares for transit authorities). However, if an enterprise fund has a second own-source revenue that is nearly as significant as the first, it should also consider presenting information for that second revenue source.	GASB Cod. Sec. 2800.709-6	GAAFR Chapter 35 - Information on revenue capacity

Yes	No	N/A	Special Unit	* Item	Question No.	Checklist Question	Citations	GAAFR reference
					18-802-02	Direct Rate – Does the statistical section present each individual direct rate applied to the revenue base for the government's most significant own-source revenue and the total of those rates, as well as the rates of overlapping governments that are applied to that same revenue base?	GASB Cod. Sec. 2800.115-.117	GAAFR Chapter 35 - Information about revenue rates (ten years)
					18-802-03	Principal Revenue Payers – Does the statistical section present information about the payers or remitters, as appropriate, for the government's largest own-source revenue for the current fiscal year and the fiscal year ended nine years prior?	GASB Cod. Sec. 2800.118-.119	GAAFR Chapter 35 - Information about principal revenue payers (current year and nine years prior)
			BTA		18-802-03-1	If an enterprise fund does not have any principal payers because all payers remit approximately the same amount, the schedule of principal payers need not be presented. In this case, the enterprise fund could include information that describes important characteristics that affect how much is paid by an individual payer. For example, higher education institutions would not normally have information about principal payers of tuition, but could provide information about the resident versus nonresident status of students.  When legal prohibitions do not allow for the presentation of information by individual payers, enterprise funds should present alternative information. For example, rather than the inclusion of individual payers, an enterprise fund could present a schedule that shows the amount of revenue by payer type.	GASB Cod. Sec. 2800.712-3	GAAFR Chapter 35 - Information about principal revenue payers (current year and nine years prior)
					18-802-04	Property Taxes – Does the statistical section present information for the government's property taxes (i.e., amount levied for each year presented, amount of the levy collected prior to the end of the year for which it is levied and the percentage that those collections represent of the total levy, amount of collections in subsequent years, the total amount of the levy collected to date, and the percentage of the total levy collected to date)?	GASB Cod. Sec. 2800.120	GAAFR Chapter 35 - Information about property tax levies and collections (ten years)
<b>STATISTICAL SECTION DEBT CAPACITY</b>								
					18-803-01	Legal Debt Margin – If the government is subject to a legal debt limit, does the statistical section present the calculation of the government's legal debt margin for the last 10 fiscal years, including the current fiscal year?	GASB Cod. Sec. 2800.128	GAAFR Chapter 35 - Information about debt limitations (ten years/current year)
					18-803-02	Ratios of Outstanding Debt by Type – Does the statistical section separately present by type the outstanding debt of governmental activities and business-type activities, as well as include the total outstanding debt for the primary government? If so, does it include: (1) The ratio of total outstanding debt to personal income? (2) The total personal income if not already presented with other demographic information? (3) The amount of total outstanding debt per capita?  Note: The amount of debt should also include any premiums and discounts associated with the debt.	GASB Cod. Sec. 2800.122-.123	GAAFR Chapter 35 - Ratios of outstanding debt (ten years)
			BTA		18-803-02-1	If personal income information is not an appropriate denominator for the enterprise fund, another appropriate economic base should be used to calculate the amount. A public utility could use the number of customers, colleges and universities could use number of students.	GASB Cod. Sec. 2800.123, .715-5	GAAFR Chapter 35 - Ratios of outstanding debt (ten years)
					18-803-03	Ratios of General Bonded Debt Outstanding – Does the statistical section present data on general bonded debt or net bonded debt for each type of debt and in total that will be repaid by general government resources and include a ratio of general bonded debt or net general bonded debt to estimated actual value of taxable property; and a ratio of net general bonded debt per capita?  Note: If the government has accumulated resources that are restricted for the repayment of outstanding debt principal, those amounts should be separately presented and deducted from the total outstanding debt to arrive at the amount of net general bonded debt.	GASB Cod. Sec. 2800.124-.125	GAAFR Chapter 35 - Ratios of general bonded debt (ten years)
					18-803-04	Direct and overlapping debt – Does the statistical section present the required information about direct and overlapping debt for governmental activities for the current fiscal year?  Note: The direct debt should include all the long-term debt in governmental activities.	GASB Cod. Sec. 2800.126-.127	GAAFR Chapter 35 - Information about direct and overlapping debt (current year only)
					18-803-05	Pledged Revenue Coverage – Does the statistical section include coverage information for non-general obligation debt that is secured by a pledged revenue stream for past 10 years?	GASB Cod. Sec. 2800.129	GAAFR Chapter 35 - Information about pledged-revenue coverage (ten years)
<b>STATISTICAL SECTION DEMOGRAPHIC AND ECONOMIC INFORMATION</b>								
					18-804-01	Does the statistical section present demographic and economic indicators including population, total personal income (if not presented with ratios of outstanding debt), per capita personal income, and unemployment rate?	GASB Cod. Sec. 2800.130-.132	GAAFR Chapter 35 - Demographic and economic indicators (ten years)
					18-804-02	Principal employers – Does the statistical section provide information about the largest ten employers in the government's jurisdiction for the current year and nine years prior?	GASB Cod. Sec. 2800.133	GAAFR Chapter 35 - Principal employers (current year and nine years prior)
					18-804-03	Does the statistical section provide operating information for the government including number of employees, level of demand for services, and capital assets?  It is not necessary for governments to begin collecting information to present in this category. Instead, governments should choose relevant items from	GASB Cod. 			School		18-804-04-1	To supplement the information normally provided for employees, the school district should consider providing the following information about teachers: salary ranges, number of teachers in each salary range, average salary, and education levels.  To supplement the information normally provided for the level of demand for services the school district should consider providing the following ratios unique to school districts: cost per student, teacher to student ratio, percentage of student body receiving subsidized lunches.  To supplement the information normally provided for capital assets the school district should consider providing the following information on individual school buildings: age, square footage, capacity, percentage of capacity currently in use.
